Minimum Viable Product MVP:

In order to help the scooter application to gain the most benefit of the business, one of the help full places to distribute the scooters in is the train stations, after getting off the train people probably will need transportation to reach their needed places. one of the easy transportation methods is scooters, the scooters will be most needed in the crowded stations. We did an EDA to MTA dataset to know the top 10 trafficked stations to put the scooters in.

Top Most Trafficed Stations Exits from Jun to Sept 2021
